

Thank You, Sir

FIRST POPPY: Young Jimmie Linam started off the 1952 poppy campaign by the American Legion Women's Auxiliary May 10 by selling the first flower to O. S. Mingus, Lago's general manager.

PROMER POPPY: Jimmie Linam a cuminsa "poppy campaign" pa 1952 door di American Women's Auxiliary dia 10 di Mei, bendiendo di promer flor cu O. S. Mingus, gerente general di Lago.

Holandes a Bishita Lago Durante Viaje Buscando Pais

Cuater Holandes buscando un pais cu nan ta desea di yama nan terra recientemente a drenta Haf di Lago. Ora nan a anera aki Dia-domingo, 11 di Mei, tabatin dos ruman, Harry y Walter Coenders, ademá J. H. de Jongh, y M. Bouman, na bordo di nan boto di 40 pia, "Cracias".

No haciendo mucho caso pa tempo, e cuater hombernan ta nabega, bishita y traha - mas of menos un procedimiento di purbamento y error pa encontra e pais na unda nan ta desea di establece nan mes. Originalmente, e huscamento di un pais nobo a cuminsa entre e dos rumannan Coenders. Mescos cu hopi Holandesnan viajando ariba lama, e dos rumannan a traha nan mes boto, ora nan a decidi di laga nan terra nativo, Holanda.

Walter, kende a traha den un shipyard na Amsterdam, a cuminsa construcion di e barco mientras su ruman tabata cumpliendo un servicio di tres anja na Indonesia cu fuerzanan Holandes. Ora Harry a bolbe, e dosnan a dedica tur nan tempo na trahamento di e barco y anja pasá e tabata den condicion pa nabega. Bao dek ainda tabatin algun pida chikito cu mester a worde completá, pero como nan no tabata kier retardá nan experimento, nan a sali for di Amsterdam ariba 1 di September 1951.

Cruzamento di Atlantico

Di Amsterdam nan a nabega pa Lisabon, Islanan Canario, y despues nan a coi rumbo ariba awanar grandi di Oceano Atlantico. Binti tres dia despues e dos rumannan a yega Martinique, viajando na un velocidad promedio di mas of menos cinco milla pa ora durante e cruzamento. Di Martinique, nan a pasa na St. Lucia y Curaçao promer cu nan a drenta Haf di Lago.

E dos rumannan a yega Curaçao mas of menos mitar di December anja pasá. Nan a keda aya mas cu cuater luna haciendo varios trabao, ganando placa, y preparando pa e siguiente etapa di nan viaje. Un di e trabaoonan cu Harry a ocupa tabata den Seamen's Club na Curaçao. Aki el a contra dos otro Holandes joven cu recientemente a laga servicio militar den fuerzanan Holandes. E jovenan, Srs. de Jongh y Bouman, a tende di plan di rumannan Coenders y a decidi di tuma parti den e buscamiento di un pais nobo.

Na Caminda pa Houston

E cuater Holandesnan a sali for di aki na caminda pa Houston, Texas. Aya nan lo bishita familiarnan di Walter y Harry Coenders. Na Houston, e hombernan lo ta poni dilanti di nan promer seleccion di un lugar. (Pa un

habitante di Texas, e seleccion ta henteramente difícil!) En todo caso, nan lo keda na Texas bastante tempo pa evita e periodo di horcan y despues nan lo alza bela pa Canada siguiendo Costa Pacifico di Estados Unidos. Den e Dominio, nan lo mantene e mes procedimiento di haci bishita, traha, y forma opinion tocante un posible lugar. Si ainda nan no ta satisfecho, Gracias lo coi rumbo pa Australia y Nueva Zelandia y nan lo continua nan viaje. Una vez nan a bishita terranan di Australasia, e decision final lo worde tumá. E pais cu a impresioná nan mas tanto lo ta nan cas. Si acaso esaki ta Canada of Estados Unidos, nan lo bolbe atrobe.

Fraternidad ariba Lamar

Como miembronan di loka ta parece un fraternidad masha intimo entre nabegantenan di barco chikito, Harry y Walter Coenders a encontra y a discuti nan experiencianan cu tres otro aventurero cu a bishita Lago recientemente. Na Las Palmas den Islanan Canario, e dos rumannan a encontra Dirk Tober, kende a anera aki dia 20 di Februari, y Joseph Pellich y James Furlong, e dos joven marineronan di Texas kende a drenta Haf di San Nicolas dia 19 di Maart.

Wanda Hassell Named Lago Club May Queen

Tiny, pert Wanda Hassell was named May Queen at the Lago Club Party held for the children of members and associate members on Saturday, May 3.

One of the highlights of the party was the Maypole Dance, the first time this event has been held at the Lago Club. Also featured on the program for the children was the fancy dress parade. The children marched across a stage where they were judged by a panel of five. The winners were Joy Guy, Lima Kadhim, Ronald Grant, Janet Fraser, Carmen Abrahamsz, Elizabeth deVries, Barbara Campbell, Kenneth Brook, Godfrey St. Aubyn, Kay Luckhoo, and Leslie Montnor.

Srs. Solognier y van Dinter a worde eligi como Nacional y Sr. Frederick como Non-Nacional. E comité completo incluyendo e miembronan ariba mencioná ta consisti di Santiago Croes, Augusto Kelly, Vicente Figaroa y Allan A. Kalloo.

Salvage Buckets Placed In Refinery

A new sight in the refinery is the salvage buckets placed in the vicinity of major jobs and located strategically throughout the yard.

At present six large buckets are in use. In the near future, 10 smaller ones will also be located throughout the refinery. The buckets are painted a distinctive color and bear sketches of the material to be dropped in them. The purpose of the buckets is to conveniently gather all salvageable items rather than have them heaped with miscellaneous refuse which possibly may have no future use.

The buckets are picked up and taken to the reclamation yard where their contents are culled for items that can be reclaimed. Once reclaimed, they are sent back to the Storehouse for future use. The six large buckets, which measure eight feet long by four and one-half feet wide by two feet deep, are located near major jobs such as general inspections. The smaller ones will be strategically placed in working areas.

In the recent PCAR job, seven full buckets were taken away from the job for inspection, pointing up the value of the salvage buckets.

Alto Vista Chapel To Be Blessed May 25 By Bishop Zeppenveldt

On Sunday, May 25, Monsigneur Bishop Zeppenveldt will bless the newly constructed chapel of Alto Vista. The ceremonies will take place from 4 to 6 p.m. Bishop Zeppenveldt will arrive in Aruba for the ceremonies at 11 a.m. on May 25.

The public is cordially invited to attend the ceremonies.

Tober's Parents Write Expressing Gratitude For Son's Aid Here

A letter written April 28 in Wormerveer, Holland, was received at the Aruba Esso News office recently. The letter, filled with deep gratitude, was written by Mr. and Mrs. J. Tober, parents of Dirk Tober, round-the-world Dutch voyager who sailed his 37-foot ketch, Onrust, into Lago Harbor on February 20.

Pictures taken while the ship was berthed here and the issue of the Aruba Esso News covering Tober's travels were sent to Mr. and Mrs. Tober by the Public Relations Department. Upon receipt of the material, Mr. and Mrs. Tober wrote the following:

"This is to express our deep gratitude for sending us your paper and the four beautiful pictures of our son Dirk. We are unable to express in words how glad we, Dirk's parents, are with these exceptionally nice photographs.

We have already framed them and

Across Seas Until A Home We Do Find

Four Dutchmen Visit Lago During Voyage To Find A Home

Four roving Dutchmen in search of a country they would like to call their home stopped off at Lago Harbor recently. Aboard the 40-foot Gracias when it arrived Sunday, May 11, were the Coenders brothers, Harry and Walter, and J. H. de Jongh, and M. Bouman.

With no concern for time, the four men are sailing, visiting, and working — more-or-less a trial and error procedure to find the land where they would like to establish residence. Actually, the search for a new home started out as a two-man project involving the Coenders brothers. Much like so many other sea faring Dutchmen, the two brothers, upon deciding to leave their native Holland, built their own ship.

Walter, who had been employed as a shipyard worker in Amsterdam, began construction of the vessel while his brother was finishing off a three year tour of duty in Indonesia with the Dutch army. When Harry returned, the two put full time on building the 40-footer and had it in sailable condition last year. There were finishing touches still to be completed below deck, but rather than detain their home-searching trek, they set sail from Amsterdam on September 1, 1951.

Atlantic Crossing

From Amsterdam they traveled to Lisbon, the Canary Islands, and then set sail on the open waters of the Atlantic Ocean. The two brothers arrived at Martinique 23 days later, averaging about five knots in the crossing. From Martinique, they stopped at St. Lucia and Curaçao before sailing into Lago Harbor.

The two brothers arrived in Curaçao about the middle of December. They remained there over four months working at various jobs, earning money, and preparing for the next lap of their search. One of the jobs held by Harry was at the Seamen's Club in Curaçao. Here he met two young Dutchmen recently discharged from the Dutch army. The young men, Messrs. de Jongh and Bouman, learned of the Coenders brothers' search for a home and joined the cruise.

On To Houston

The four Dutchman left here bound for Houston, Texas. There they will visit relatives of the Coenders. In Houston, the men will be faced with their first choice of a home. (To a Texan, the choice wouldn't be very hard at all!) At any rate, they will stay in Texas long enough to avoid the hurricane season and then set sail for Canada via the U.S. Pacific

HOME SEEKERS: Four roving Dutchmen stopped at Lago Harbor recently on their trip to find a country in which they would like to live. The men left Lago for Houston, Texas. Pictured standing aboard the 40-foot Gracias are the Coenders brothers, Harry and Walter, standing left to right, and kneeling in the same order are M. Bouman and J. H. de Jongh.

BUSCANDO UN LUGAR: Cuater viajante Holandes recientemente a anera den Haf di Lago ariba nan viaje en busca di un terra den cual nan ta desea di biha. E homhernan a sali for di Lago pa Houston, Texas. Ariba e retrato nos ta mira na bordo di Gracias, nan boto di 40 pia, Harry y Walter Coenders, pará di rohez pa drechi, y na rudia den mes secuencia H. Bouman y J. H. de Jongh.

coast. In the Dominion, they will adhere to the same procedure of visiting, working, and forming opinions about a possible home site. If they still are not satisfied, the Gracias will be pointed toward Australia and New Zealand and off they will go. Once they have visited the lands of Australasia, the final decision will be made. The country that impressed them most will be their home. If it happens to be Canada or the United States, back they will come.

Sea Fraternity

As members of what seems to be a closely knit fraternity of small boat sailors, the Coenders brothers had met and exchanged experiences with three other voyagers who visited Lago recently. At Las Palmas in the Canary Islands, the two brothers met Dirk Tober, who stopped here on February 20, and Joseph Pellich and James Furlong, the two Texans who visited here on March 19.

Saul Jacobo Ruiz

Saul Jacobo Ruiz, a former Lago employee, died suddenly on May 10 while participating in a football game in Caracas, Venezuela. While at Lago, he worked in the Cable Office. He was 30 years old.

DIEZ ANJA PASA

Un di e sucesonan mas importante den historia di Lago durante Mei 1942, tabata presentacion di dos platchi di seguridad na dos departamento cu a cumpli 1,000,000 ora di trabao sin desgracia di perdida di tempo. Gerente general di Lago, O. S. Mingus, kende e tempo tabata superintendente di division, a haci e presentacion na F. J. Penny pa empleadonan di Receiving & Shipping Department, y na R. V. Heinze, kende a termina su servicio recientemente, pa empleadonan di Acid & Edlecanu Plant.

Aruba Esso News di 22 di Mei, 1942, a duna hopi comentario tocante tiempo ariba ultimo dia di April. Ta parce cu riba ultimo dia di April diez anja pasá a yobe mes tanto awa, cu desde promer dia di e anja. Un total di 1.1 duim di awa a cai lagando henter suelo di e isla bon muha.

Teamnan di Lago den Aloe League na Lone Palm Stadium a duna amantenan di baseball hopi actividad pa mira. John Vachal a bati di promer home-run di e periodo, Sheldon Jones a bati un otro di Lago su promer caredanan batiendo un bala cu a worde tirá door di Joe Kennerty pa Joe Proterra.

In The Days Of Yore At The Turn Back The Clock Dance

ALICE IN WONDERLAND: One of the most eye-catching groups at the recent Turn Back The Clock Dance was the Alice in Wonderland ensemble. Pictured are the members of the group who portrayed Alice's soldiers, all of whom carried cards of spades and spade-shaped maces.

ALICE DEN TERA DI MARAVILLAS: Uno di e gruponan mas atrayente pa bista na e reciente Baile di Temponan Pasá tabata e grupo di Alice den Tera di Maravillas. Munstrá ariba e retrato ta e hobencitas di e grupo cu ta representa soldanan di Alice, tur cargando carta di espada y scepter cu forma di espada.

ROYAL QUEEN: In the Alice in Wonderland group was the Queen of Hearts portrayed by this lovely lady, otherwise known as Joe Proterra.

REINA DI CORAZON: Den e grupo di Alice den Tera di Maravillas tambe e Reina di Corazon tabata representá door di e hobencita amable aki conoci como Joe Proterra.

ARUBA'S ROCKETTES: One of the highlights of the floor show was this line of 10 lovelies. The appeal of their precision steps was most notable in the ovation they received from the many folks who attended the dance. Many unique costumes were worn at the Rotary-sponsored affair.

"ROCKETTES" DI ARUBA: Un di e partinan mas interesante di e exhibicion ariba excenarion tabata e grupo di 10 bellezas. E acogida di nan baile di precision tabata masha remarcable door di e aplauso cu nan a ricibi for di e gran cantidad di hende cu tabata presente na e baile. Hopi trajesh y di varios modelo a worde bisti na e fiesta aki duná bao auspicio di Rotario.

OPENING

Joe

O. S. Mingus officially opens new station.

O. S. Mingus ta habri e stacion nobo oficialmente.

Oduber's New Esso Servicenter

On Saturday, May 3, several hundred people attended the grand opening of Joe Oduber's new Esso Servicenter. O. S. Mingus, Lago's general manager, cut the ribbon, above, and the new station became a beehive of activity. The first customer, who with seven others received five free gallons of gas, was J. I. di Costa, below left, of the Cracking Plant. The new owner, right, received congratulations from Mr. Mingus while William Kaestner, Marketing representative, looks on. Besides the free gifts for adults, the children were remembered with bubble gum and helium-filled balloons, below right.

Diasabra, 3 di Mei, varios cien hende a presencjá e apertura grandioso di e Esso Servicenter nobo di Joe Oduber. O. S. Mingus, Gerente General di Lago, ta corta e cinta, ariba, y e stacion nobo a transforma na un cas di maribomba di actividad. E promer cliente, kende hunto cu 7 otro a ricibi cinco galon di gasoline gratis, tabata J. I. Di Costa, banda robez abao, di Cracking Plant. E propietario nobo, banda drechi, ta ricibi felicitaciones di Sr. Mingus mientras Bill Kaestner, representante di Ventas, ta mirando. E muchanan tambe a worde recordá cu bubble gum y balon yená cu helium, abao banda drechi.

Best of luck, Joe.

Bon exito, Joe.

Five free gallons, sir.

Cinco galon gratis, Senjor.

We were there, too.

Nos tambe tabata ey!

Off to a busy and prosperous future.

Ariba camina pa un futuro activo y prospero.

Many Lago and Island officials attended. Oficialnan di Lago y e Isla tabata presente.

PRESENTING 90 CYIA

Some Of The Big Winners

Fls. 650

Fls. 250

Individual ingenuity and alertness to possible Company improvements pays off every month through the Coin Your Ideas plan. Recently, 90 Lagoites became from Fls. 20 to Fls. 650 richer as a result of their accepted ideas. Have you been active in the CYI? That idea you've been carrying around might possibly be worth money. Jot it down on a piece of paper and send your idea to CYI. It's easy and can mean extra money for you.

W. C. Keefer received Fls. 650 for his idea to salvage bottom and skirt sheet plates.

The second highest award of recent winners went to Alvaro I. Rodrigues whose suggestion regarding a jump over from Tower 4 pump out line won Fls. 250 for him

Fls. 125

Fls. 100

E. Koolman looked for improvement in his own department. He came up with an idea to revise the method of calculating fees. His alertness to Company improvement was worth Fls. 125.

Ingenuity was the key to N. Tromp's CYI award of Fls. 100. Working around the tar cruce heat exchangers, Mr. Tromp devised a tool for tightening and loosening packing glands.

Fls. 100

Fls. 100

Fls. 100

J. Jamieson received a Fls. 100 award for his accepted suggestion to remove the siding east and west of the hot oil pump rooms on Combination Units Nos. 1-4. Mr. Jamieson's suggestion will provide more light and also improve ventilation in that area. The idea will improve working conditions for all in HOP rooms.

Fls. 100 was awarded to M. R. Holly for his idea to equip transformers and hand lamp extensions with twist-lock and duplex outlets and caps.

Another of six employees who recently received Fls. 100 for coined ideas was G. P. Schwengle. He suggested the installation of a line to No. 7 Combination Unit which involved the lower stripper and storage lines. This idea is just another of the many ways employees assist in Company improvements.

AWARD WINNERS

Fls. 175

The very practical suggestion of A. Hanlon to prime paint butt joints on louvre screen frames made Mr. Hanlon Fls. 175. His was the fourth highest award.

Fls. 200

Ingeniosidad y vigilancia individual pa posible mehoracion di Compania ta paga tur luna door di e plan di Coin Your Ideas. Recientemente, 90 Lagoista a bira Fls. 20 te Fls. 650 mas rico como resultado di nan idea cu a worde acceptá. Bo tabata activo den CYI? E idea cu bo ta cargando den bo cabez pa hopi tempo caba probablemente por vale placa. Scirbié ariba un pida papel y manda bo idea na CYI. Esaki ta facil y por nifica placa extra pa bo.

L. Thysen's idea to expand the four inch tube expander received the sum of Fls. 200.

....and here are other CYI winners

Congratulations CYI Winners

Fls. 80

Worth Fls. 80 to B. Breuver was his idea to reuse the water in testing cylinders. The idea means saving water and speeding up the job.

Fls. 75

R. J. Kennerty received an award of Fls. 75 for his suggestion to install a monorail on the west side of the Ed. Plant pumphouse.

Johnson and Marcial Receive Promotions

R. A. Johnson of the Process Control Group and Frank Marcial of the Dining Halls were promoted recently. Mr. Johnson's promotion elevated him to the position of Group Head B of the Finishing Operations Section. Mr. Marcial was promoted to the position of general supervisor of the Dining Halls.

R. A. Johnson Frank Marcial

Mr. Johnson's employ with Lago began in May, 1943, as a student engineer II in the Process Department. A year later he advanced to the position of junior engineer. He made successive steps as a chemical engineer becoming a chemical engineer A in September, 1947. His latest promotion was effective May 1.

Mr. Marcial started as a dining hall supervising cook in September, 1942. He advanced through the position of night supervisor in the Esso Dining Hall to supervisor of the dining hall in February, 1947. His new position was effective May 1.

(Continued on page 8)

TEN YEARS AGO

One of the highlights of Lago life in May, 1942, was the presentation of safety plaques to two departments upon completion of 1,000,000 man-hours of work without a lost time accident. Lago general manager, O. S. Mingus, who at the time was division superintendent, made the presentations to F. J. Penny for the employees of the Receiving and Shipping Department, and R. V. Heinze, recently retired, on behalf of employees of the Acid and Edeleanu Plant.

The Aruba Esso News of May 22, 1942, made much ado about the weather the last day of April. It seems that on the last day of the fourth month ten years ago, as much rain fell as had fallen since the first of the year. A total of 1.1 inches fell soaking the ground throughout the island.

Lago's teams in the Aloe League at Lone Palm Stadium gave baseball fans plenty of activity. John Vachal hit the first homer of the season. Sheldon Jones scored another of Lago's first runs on a passed ball just beating the throw from Joe Kennerty to Joe Proterra.

Small-Boat Sailors Write of Appreciation

A letter to President J. J. Horigan reports the thanks of James Furlong and Joseph Fellich, world-wandering Texans who pulled into San Nicolas harbor last month after a 26-day crossing of the Atlantic in a 30-foot boat.

"It is difficult," they said, "to express in a few words our appreciation for the kind generosity extended to us by your company and its employees. Please accept our heartfelt thanks for the many kindnesses; our recollections of our stay in Aruba will always be pleasant ones."

After leaving Aruba the sailors hoped to wind up their 16-month voyage in another six weeks, visiting Jamaica, Cuba, and a number of Gulf Coast ports before selling the boat in Houston, Texas.

Ken Mester di un Schooner di 46

J. Liverpool, un empleado di Powerhouse, ta yudando su omo na Grenada bende un barco di motor di 46 ton cual el ta bisa ta un barco excelente y net di e grandura pa pisqueria. E ta 75 pia largo, 18 pia hanchu y tin un motor di diesel GMC di 56 forza di cabai. E mecanismo di transmision, compas, boto salbada y otro mecanismo tur ta den bon condicion y si bo ta asina interesá den piscamento e prijs ta \$ 15,000.

Sr. Liverpool por worde contactá na su cas Rooi Hundo No. 71.

New Pilot House Improves Harbor

NEW PILOT HOUSE: On April 2, Lago Harbor pilots moved into their new quarters. The new and modern building constructed by the Government replaces the old pilot house near the Marine annex.

CAS NOBO DI LOODS: Dia 2 di April, loodsman di Waf na Lago a muda pa nan edificio nobo. E edificio nobo y moderno, trahá door di Gobierno ta reemplaza e cas bieuw di loods banda di Marine Annex.

LEAVING LAGO: Adalbertus Willems of the Carpenter Shop will retire June 1 after completing 27 years of service with Lago. Mr. Willems started on May 5, 1925, and spent his entire Company service in the Carpenter Department.

LAGANDO LAGO: Adalbertus Willems di Carpenter Shop lo termina su servicio dia 1 di Juni despues di completa 27 anja di servicio en Lago. Sr. Willems a cuminsa traha dia 5 di Mei, 1925, y a pasa henter su servicio en Compania den Carpenter Shop.

Mayornan di Tober Ta Expresa Gratitud pa Nan Yiu

Un carta scirbí dia 28 di April na Wormerveer, Holanda, a worde recientemente recibi na oficina di Aruba Esso News. E carta aki, yená di un gratitud profundo, a worde scirbí door di Sr. y Sra. J. Tober, mayornan di Dirk Tober, un navegante Holandes cu ta haci un viaje rond di mundo, kende a dreña waf di Lago cu su barco di 37 pia "Onrust" dia 20 di Februari.

Retratonan tumá mientras e barco tabata mará aki y e edicion di Aruba Esso News cubriendo storia di viajanan di Dirk Tober a worde mandá pa Sr. y Sra. Tober door di Departamento di Relaciones Publico.

Despues cu nan a recibi esakinan, Sr. y Sra. Tober a scirbí lo siguiente: "Esaki ta pa expresa nos profundo gratitud pa e edicion di bo corant y e cuater bunita retratonan di nos yiu Dirk. Nos no ta capaz pa expresa den poco palabra com contento nos, mayornan di Dirk, ta cu e retratonan tan bunita.

Nos a pone nan den leishi caba y nan a haya un lugar den nos sala. Nos alegria ta masha grandi di tende cu Dirk a encontra asina tanto amigo y a recibi asina tanto cariño. Aruba tabata di ultimo pida territorio Holandes pe, y el ta masha entusiastico tocante hendenan na Lago Oil & Transport Co., Ltd.

Nos ta spera cu el lo holbe cas atrobe. Aruba un recuerdo agradable pa y pa nos tambe."

Aruba Esso News a tende di Tober ultimo biaha ora el a pasa den Panama Canal cohiendo rumbo pa lamar grandi den Pacifico.

Federico Croes

Federico Croes, a Corporal A in Garage and Transportation, died at his home in Paradera on May 7. He was 44 years of age. Survivors are his wife and six children. He had been employed by Lago for 18 years and three months.

Hemchi pa Recoge Material Usá Den Refineria

Un vista nobo den refineria ta hemchinan pa recoge material usá cu ta poni den vecindario di trabao-nan grandi y tambe strategicamente den henter planta.

Actualmente seis hemchi grandi ta na uso. Den futuro cercano, 10 otro hemchi mas chikito lo worde poni den refineria. E hemchinan ta geverf y ta carga sketch di materialnan cu mester worde tirá aden. Obheto di e hemchinan ta pa recoge tur material y no laga nan hunto cu otro cosnan diverso cu posiblemente lo no haci uso mas.

E hemchinan ta worde echi y hibá reclamation yard na unda nan ta rista e contenido pa articulonan cu por worde drechá. Una vez nan ta drechá, nan ta worde mandá Storehouse atrabe pa uso den futuro. E seis hemchinan grandi cu tin 8 pia largo, 4 1/2 pia hanchu y 2 pia hundo, ta poni den vecindario di trabao-nan grandi manera general inspections. Eunan mas chikito lo worde poni strategicamente den henter refineria.

Durante trabao reciente ariba PCAR, siete hemchi yen a worde hibá for di e trabao pa inspeccion, accentuando e valor di tal sorto di hemchinan pa recoge material.

NEW YORK AND TEXAS: Eugene Cedeno of M & C Garage and Lawrence Engelking, EIG group head, recently left Lago for New York City and Texas, respectively. Mr. Cedeno, left above, was presented a check by W. D. Casey on behalf of fellow employees. He had seven years Lago service and plans to study automotive repair in New York. Mr. Engelking, right above, was presented a clock by his fellow workers. He had been employed by Lago for over 13 years.

RECENTLY MARRIED: Celestino Quandus of the Marine Department and Eric B. Lewis of the Marine Finance & Insurance Division married recently. Mr. Quandus, left below, was married to Ana Bartola Galibia on May 7. His coworkers presented him a table clock as a wedding gift. Mr. Lewis, right below, married Ethel Boatman of St. Vincent on April 19 at the San Nicholas Anglican Church. L. Pinedo presented him a china set of 130 pieces from fellow workers.

SALVAGE BUCKET: Pictured is one of the buckets that have been placed around the refinery. Ten additional buckets will soon be in use. In the event it develops that more buckets are needed, additional ones will be constructed and put to use in refinery working areas.

HEMCHIN PA RECOGE MATERIAL: Aki nos ta mira un di e hemchinan cu a worde poni den refineria. Diez hemchi mas lo ta na uso pronto. Si acaso resulta cu mas hemchi ta necesario, algun adicional lo worde trahá y poni na uso den refineria.

Trophies To The Victors

THEIR TEAMS WON: Lago Vocational School football competition was concluded April 26. Pictured above, left to right, are the captains of the four most successful teams: Veronico Alberts, Class 3-51, first year champions; John Hirschfeld, Class 4-51, first year runners-up; Julian Kock, Class 1-49, senior and intermediate champions; and Ruben Nicolaas, Class 1-50, senior and intermediate runners-up.

NAN TEAM A GANA: Competición di futbol di School di Ofishi di Lago a termina dia 26 di April. Munstrá aki riba (robez pa drechi) ta captains di e cuater mehor teamnan. Veronico Alberts, Class 3-51, campeonnan di promer anja; John Hirschfeld, Class 4-51, segundo equipo den competición, Julian Kock, Class 1-49, y Ruben Nicolaas, Class 1-50.

Preparations Readied For Lago vs. CPIM Cricket Tournament

Preparations have been completed for the annual Lago-C.P.I.M. cricket tournament scheduled for the Whitsuntide weekend at Lago Sport Park. Over 40 cricketers have been invited to practice with the final practice match to be played Sunday, May 25.

Following the final practice session, the Selection Committee, comprised of Messrs. Matthew John, Stanley Smith, Cecil Bristol, Claude Haynes, and Charles King, Sr., will pick the two teams to compete against the C.P.I.M. stars.

The captaincy of the Lago All Stars and Lago's "The Rest" has been entrusted to the capable leaders, Messrs. John and Smith, by the Lago Sport Park Board. Robert E. A.

Martin, chairman of the Lago Sport Park Board, will preside over the meetings of the Selection Committee as a non-voting chairman.

Program

The weekend list of activities will include the following: Beginning at 10 a.m. and continuing through 6 p.m. on Saturday, May 31, a trial match between C.P.I.M. and Lago's "The Rest" will be played. At 7.30 p.m. on the same day, a C.P.I.M.-Lago table tennis tournament will be played in the Lago Club.

From Sunday, June 1 at 10 a.m. through Monday, June 2 until 5 p.m., the main cricket test match between the C.P.I.M. All Stars and the Lago All Stars will be contested. A billiards tournament will be held at the Lago Club beginning at 7.30 p.m. on June 1 between the two refinery representatives. Following the completion of all competitions, C.P.I.M. athletes will be feted by Lago at a banquet at the Lago Heights Dining Hall on Monday, June 2.

Basketball Champions

CHAMPIONSHIP SQUAD: Members of the Chinese Club basketball team, winners of the Aruba Basketball Association League, pose with the championship trophy. Kneeling, left to right, are Wather Wong, Ho Siew, Ng Sang, and Fat Chong. Standing, left to right, are Roderick Chin, Liew Siong, Percy Yee, Chong Chick, and Chin Sin Theam, manager.

EQUIPO DI CAMPEON: Miembronan di e equipo di basketball di Club Chines, ganadornan di Liga di Aruba Basketball Association, ta posa cu nan copa di campeonato. Na rudia, di robez pa drechi, ta Walter Wong, Ho Siew, Ng Sang, y Fat Chong. Pará, robez pa drechi, ta Roderick Chin, Liew Siong, Percy Yee, Chong Chick, y Chin Sin Theam, manager.

Friendly Battle of the Giants

Barbados, St. Vincent Play to A Draw Before Large Crowd

In the Lago Sport Park cricket competition, the Barbados CC played to a draw with the St. Vincent CC before a record crowd for a local match in the Lago Sport Park. The evenly matched contest, which had a tremendous amount of public appeal, was played Sunday, May 18.

Matthew John, captain of St. Vincent, won the toss and sent his opponents to bat on a perfect wicket. Barbados at bat received its first shock when centurian Frank Bryan was returned to the pavillion with a meager 4 runs to his credit.

The play that caused the loss of Bryan's wicket was on a most brilliantly executed change of pace ball from fast bowler Ralph Walker which Bryan cocked into the air. Walker, moving in quickly, brought up the ball with a lefthanded catch off his shoestrings. Backed by the sharpest fielding ever witnessed in the Sport Park, the St. Vincent bowlers returned the Barbados star batsmen to the pavillion at a remarkably fast pace. The scoreboard read 1 for 20, 2 for 20, 3 for 25, 4 for 39, 5 for 57 when fleetfooted Frank Martindale came to bat. To Martindale, the lightweight with the speed of a heavyweight, should go the credit for stopping the "rot." Although he scored only 9 runs before being unfortunately run-out, he rattled his opponents by his alertness and daring running between wickets and shook their confidence irreparably.

Sealy Scores

To prove the glorious uncertainties of cricket, Captain George Sealy chalked up 44 runs and young Glenroy Straughn and Arthur Shockness contributed brilliant knocks at 28 and 29 runs, respectively, and were undefeated. With the loss of 9 wickets, Capt. Sealy closed the Barbados inning at 201 runs. Another outstanding batsman was Osbert Ifill who scored 35.

St. Vincent went to bat at 2:30 p.m. faced with the next to impossible task of scoring 202 runs in two and one-half hours to win. Capt. John decided to follow the sound strategy of playing for a draw. The decision to play this way resulted in St. Vincent suffering the loss of only 5 wickets for 102 runs at the close of play.

The outstanding scorers for St. Vincent were Caly Bonadie and C. R. Nicholas. Messrs. Bonadie and Nicholas scored 47 and 28 not out, respectively.

Both teams have now played 4 matches with each winning 3 and playing to a draw in the other. Barbados, however, won a match outright and thereby enjoys a 1 point edge over St. Vincent.

Solognier, Frederick And van Dinter Elected to LCAC

Thomas Solognier, Julio van Dinter and Seon I. Frederick were elected for a two-year term to the Lago Commissary Advisory Committee in the May 14, 15, and 16 elections. Both Mr. van Dinter and Mr. Frederick were re-elected while Mr. Solognier is new to the committee.

Messrs. Solognier and van Dinter were elected as Nationals and Mr. Frederick as a Non-National. The full committee with the above consists of Santiago J. Croes, Augusto Kelly, Vicente Figarea, and Allan A. Kulloo.

Tober's Parents Write

(Continued from page 1)

put them up in our livingroom. How great is our joy to know that Dirk met so many friends and received so much kindness. Aruba was the last piece of Dutch territory for him and he is highly enthusiastic about your people at the Lago Oil & Transport Co., Ltd.

We hope he will come home again. Aruba is a pleasant remembrance for him as well as for ourselves."

The Aruba Esso News last heard from Tober when he passed through the Panama Canal and headed into the open Pacific.

Two Lagoites Named To Olympic Football Team of the Antilles

Two Lago employees were among the seven Arubans selected for the 20-man football squad which will represent the Netherlands Antilles in the 1952 Olympics at Helsinki, Finland, this summer. The two employees chosen were Juan Briezen of the Catalytic and Light Ends office and Jorge Brion of the Pipe Department.

Jorge Brion

Juan Briezen

Other Aruban athletes named to the squad were Jani Brokke, one of the island's outstanding athletes, Carlos Helder, L. Hernandez, Raymundo Kemp, and Leo Rodriguez. The seven men are practicing with the remainder of squad in Curaçao on weekends.

The selections of the 20 players were made following a series of Olympic test matches between Aruba and Curaçao. Games were played both in Curaçao and at the new Wilhelm Stadium here. Last month, the two teams met here just prior to the selections with Aruba holding Curaçao to a 2-2 tie in the first game and losing the second in the final minutes of the game, 1-0. The selections were made by the Team Selection Committee of Curaçao. Three leaders will accompany the squad.

An announcement was made recently that Lago had joined the many industries and businesses of the area who are assisting in the financial arrangements of the trip. Because of the international good will fostered by the Olympics, Lago has contributed Fls. 3000 to the fund to send the team. In addition because of the very special nature of the occasion, the Company will grant time off with pay to the two employees who are members of the squad.

Baby Ruth Wins Third Straight Game In Lago Heights Loop

Baby Ruth, exhibiting mid-season form, romped to its third straight win last week in the Lago Heights Softball League. With all members of the team in a free-swinging mood, the league leaders blasted the Hornets, 29-4.

In other A Division games, Nash whitewashed the Caribe Club 19-0. The game was highlighted by the all-around ability of the Nash team members. Not only did they score 19 runs with ease, but defensively they excelled in holding Caribe scoreless. Two runs marked the difference in the other two A Division games. La-Salle edged San Lucas 9-7 and Amstel eased past the Hornets 17-15.

The defeat at the hands of Amstel marked the Hornets' fourth consecutive loss. Only one game was played in the B Division. In that lone game, Oranje defeated the Indians 6-5 in the closest game to date. Although they didn't play, members of Oranje received credit for a win over the Cracker Jacks when the later team defaulted.

Two Youthful Cricketers Perform with West Indian

Two very young athletes made their debut in first class cricket competition on May 4. Walter Havertong, 14, and Michael Da Silva, 13, gave a good account of themselves as members of the West Indian United CC against the St. Eustatius CC. Besides bowling 8 overs and capturing 1 wicket, Michael ran out Herman Lopes on a beautiful play. Left arm slow bowler Havertong performed the record feat of capturing not less than 7 wickets.

Another batsman to join the ranks of the elite is Mohamed Haniff of Commonwealth who passed the magic century and scored 111 runs against the Rising Sun CC on May 11. Another record for local matches was established with a first wicket partnership of 120 runs accomplished by Messrs. Haniff and Willis Goulde.

And here is a pippin for the books! Tenchie Hoftijser, the local Bobby Thomson, introduced his baseball slugging tactics into cricket. Tenchie's team, the Shamrock CC, engaged the Dominica CC at Lago Heights on May 17. Tenchie was a man in a hurry. He had to work 4 to 12. So slugger Tenchie heaved his bat to his shoulders and in quick time slammed 9 sixes to the boundary and topped it off with a round dozen of fours interspersed with a few singles to register 105 not out.

Fistic Action

IN CLOSE: One of the highlights of the local boxing scene took place Saturday, May 10, at the Arena Nacional when BG's Calvin Garroway decided Wilfredo Miró, Cuban middleweight champion, in 10 rounds. The BG favorite is shown driving Miró into the ropes with a heavy body attack. Garroway's offensive moves were mostly inside. Referee Bill Hochstuhl is on the right.

ATAKE FUERTE: Un di e sucesonan mas importante den boxeo local a tuma lugar Diasabra anochi, 10 di Mei, den Arena Nacional ora Calvin Garroway a gana Wilfredo Miro, campeon middleweight Cubano pa decision den 10 rond. Aki nos ta mira e favorito di B.G. hincando Miro den cabuya cu un atake fuerte den curpa. Atakenan di Garroway pa mayoria parti tabata den curpa. Referee Bill Hochstuhl ta na banda drechi.

Blow - Blow - Blow

BIG BUBBLES: In a Philadelphia laboratory, three dignified researchers sit from 9 a.m. to 5 p.m. blowing bubbles. Fun? Hardly. They are the research department of the Frank H. Fleeer Corporation, makers of Dubble Bubble Gum, seeking ways to add chewiness and blowing power to their product. Dubble Bubble Gum is today a mass production affair made on assembly principles. In a spotless plant, special machinery, electronic controls, quality checks, research laboratories, tests of all descriptions — assure young folks throughout the world of a pure, uniform product with detonating qualities.

BUBBLES GRANDI: Den un laboratorio na Philadelphia, tres investigador ta sinta for di 9 'or di mainta te 5 'or di atardi supla bubbles. Pret? Talvez. Nan ta forma departamento di investigacion di Frank H. Fleeer Corporation, trahadornan di Dubble Bubble Gum, buscando manera pa agrega mas suavedad y forza di supla na nan productonan. Dubble Bubble Gum awe ta un articulo di produccion na gran escala — traha segun principio di asamblea. Den un planta limpi, maquinaria special, control electronic, examinacion di calidad, laboratorio di investigacion, test di tur sorto di descripcion ta asegura jovennan den henter mundo di un producto uniforme y puro di calidad detonante.

Business Built On A Bubble - Making Chewing Bubble Gum

One of the most sought after items in Aruba -- and throughout the world -- is bubble gum. When a shipment arrives, Daddy's headaches start in trying to keep the supply equal to the demand of the younger members of his family, to say nothing of the younger members' playmates. Mother's headaches soon follow trying to keep the youthful faces clean of the sticky substance that somehow ends up on the nose, the chin and other facial points as a result of a bigger bubble than Tommy can blow.

That boom and bust you've heard about isn't as serious as you think. Actually, it's getting louder each year, because more and more kids throughout the world are chewing bubble gum.

The Frank H. Fleeer Corporation of Philadelphia, makers of "Dubble Bubble," the largest selling penny confectionery item in the world, report that they shipped over a billion pieces of the famed Dubble Bubble brand to every corner of the globe last year. That's enough, incidentally, to reach three times around the Equator if you laid the pieces end to end. While Fleers didn't begin making Dubble Bubble until 1928, the company itself is now more than a century old and the business has been in the same family since its founding in 1849.

In the 24 years since its introduction, Dubble Bubble has not only swept the U.S. but has become a standard chew in many a far-flung land. World War II had a lot to do with that. Servicemen carried the product abroad, and, as GIs have always done, shared their candies and gum with moppets wherever they were stationed.

Today the gum and its colorful double wrapping with comics, a fact and a fortune inside each piece, is available in Africa, Japan, Borneo, Alaska, Pitcairn Island, to name just

a few of these far-flung points. A tour of Dubble Bubble's spotless Philadelphia home proves to be as fabulous as Fleeer executives' tales of lonely Pitcairn Island and the bubble gum cravings of Bounty mutineers' present day descendants. You can, for example, start the tour at the beginning and end simultaneously. That is, at the Fleeer research laboratory, jammed with skilled technicians who keep a constant quality check on the flow of raw materials into the factory — and an equally vigilant watch over the out going Dubble Bubble.

The Laboratory

In this lab you see such contrasting sights as serious, white-coated scientists peering intently through their precision instruments — while across the room sit three pretty young ladies without a thing to do except blow bubbles. But blowing these bubbles is part of their job; part of the checkup to assure Junior of his full quota of "blow-for-blow" from each penny piece of gum.

Here in the lab "torture tests" are applied to samples of the finished gum on the unique Fleeer "stretch-o-meter," an instrument designed to insure Junior's maximum chomping mileage. In another part of the lab two technicians grapple with a huge sheet of Dubble Bubble, stretching it to the breaking point to make sure

Bubble Gum Ta Gusta Door di Henter Mundo

Un di e articulonan mas bendi na Aruba — y den henter mundo — ta bubble gum. Ora un carga yega, dolor di cabez ta cuminsa pa e tata cu kier percursa pa bastante bubble gum pa su yunan. E mama tamba ta haya dolor di cabez pronto pa e caranan chikito limpi di e obheto cu ta plak y cu di cualkier manera ta keda pega ariba nanishi, cachete y otro partinan di cara como resultado di un bubble mas grandi cu esun cu Tommy por supla.

Tur e desorden cu bo a tende di dje no ta tanto serio manera bo a pensa. En realidad, e ta birando cada anja mas grandi, pasobra mas y mas mucha den henter mundo ta kauw bubble gum.

Frank H. Fleeer Corporation di Philadelphia, trahadornan di "Dubble Bubble", e articulo chikito cu ta worde bendi mas tanto na mundo, ta reporta cu nan a bende mas di un billion pida di e afamado Dubble Bubble den tur skinanan di globo anja pasá. Esaki ta bastante, pa yega tres biaha rond di Equator si nan worde poni banda di otro. Mientras Fleeer no a cuminsa traha Dubble Bubble sino te 1928, e compania mes ta mas di un siglo bieuw awor y e negoshi ta den man di mes un fa-

the sample will stand up to the sustained chewing of powerful young jaws. A piece of gum stretched till it covers the better part of a wall is indeed a sight to see.

How do you manufacture the boom and bust item. Curiously enough, like planes and autos, you mass-produce it. The lab-approved ingredients are placed in huge, steam-heated vats which cook and churn for hours until the raw gums and syrups are thoroughly mixed. Next flavoring and sugar, finely powdered and certified by the research department, are added.

This is now called a "batch." Tumble the batch out of its cooking oven, sprinkle it lightly with sugar as a good cook would sprinkle pie crust to prevent sticking — cut it up into rough squares, and then toss it into an extruding machine where the assembly line production operation begins.

If you took the cap off a tube of toothpaste, and pressed it, two things would happen: 1) a long ribbon of toothpaste would spurt out, and 2) you'd have a perfect example of what the word "extrusion" means. That ribbon of toothpaste would have been "extruded" out of the tube in much the same manner that the Fleeer Company extrudes their "batches" out of a machine under heavy pressure.

These long, individual ropes of gum are called "pencils" and are fed into machines at processing "stations." Each station has a complex machine that sucks in the continuous "pencils" of gum and then chops off bite-sized hunks which the machine automatically wraps and seals.

Finished Units

These finished units of Dubble Bubble are next assembled into compact boxes and the boxes started on their way toward the Fleeer shipping room by means of a conveyor belt.

Once they arrive at an assembly point they are inspected and packed into shipping containers and assembled into truckload or carload lots and shipped off to their various destinations.

The stories from these different places are many. For instance, GIs stationed in Alaska during the last war introduced Dubble Bubble to the Eskimos. Those toughchewing customers now prefer Dubble Bubble to their erstwhile favorite blubber. In Borneo, headhunters recently captured a diplomatic official and politely held him for ransom. The ransom? Dubble Bubble gum. Deep in deepest Africa, a proper amount of Dubble Bubble gum will purchase you a wife — in lieu of the usual two oxen and half a herd of sheep. Seems that the natives are plenty savvy — they regard Dubble Bubble, despite its stretch, as a medium of stable exchange.

As for the Pitcairners — it was recently reliably reported that the mutineers' descendants anxiously scan the horizon for the first sign of the semi-annual mail boat long before it's due, because the first inhabitant of this two-square mile island to spot the boat bearing a Dubble Bubble shipment is rewarded by an extra share in the booty.

It's easy to see why this product has to be mass-produced — it has become a "must" throughout the world.

milia desde su establecimiento na 1849.

Den e 24 anjanan desde su introduccion, Dubble Bubble no solamente a gana acogida den henter Estados Unidos, pero a bira tambe un bals standard den hopi terranan lejano. Segundo guerra mundial a contribui hopi na esaki. Soldanan a hiba e producto na terranan estranhero, y, manera GIs a haci semper, nan a parti nan candy y bals cu muchanan chikito unda cu nan ta stacioná.

Awe e bals y su papel coloroso cu comics, un hecho y un fortuna den cada pida, por worde hayá na Africa, Japon, Borneo, Alaska, Isla Pitcairn, pa nombra solamente algun di e puntonan mas leu.

Na Philadelphia

Un paseo den Dubble Bubble su fabrica sanitario ta parece mes fabuloso cu storia di checutivonan di Fleeer tocante decendientenan di motinadornan na Bounty. Por ehemplo, bo por cuminsa bo paseo na principio y fin na mes tempo. Esaki kier meen, den laboratorio experimental di Fleeer, cu su hopi tecniconan experto kende ta tene un control constante ariba corriente di material crudo den fabrica — y ta tira un vista mes vigilante ariba e Dubble Bubble cu ta sali.

Den e laboratorio aki bo ta mira vistanan cu ta forma contraste grandi, por ehemplo algun cientista serio, bisti na blanco cu ta vigila continuamente door di nan instrumentonan preciso — mientras na otro banda di e cuarto ta sinta tres senjorita atractiva cu no tin nada otro di haci sino supla bubbles henter dia. Pero suplemento di bubbles ta parti di nan trabao; parti di e control pa asegura Junior di maximo calidad den cada pida di su bubble gum.

Aki den e laboratorio "test" ta worde aplicá ariba muestranan cu un "stretch-o-meter", un instrumento designá pa asegura cu Junior por kauw su pida bals mas largo. Den un otro parti di e laboratorio dos tecnico ta traha cu un pida Dubble Bubble grandi, mientras nan ta rek e te ora e ta cerca di kibra pa asegura cu e muestranan por wanta kauwmento di cachetenan joven y fuerte. Un pida bals gerek te ora e ta cubri mayoria

Trahamento di Bals

Com e articulo popular aki ta worde traha. Bastante curioso, mescos cu aeroplane y auto aruba linea di produccion. E ingredientenan aprobá door di laboratorio ta worde poni den weanan grandi di steam cu ta herebe y cushina oranan largo te ora e gum curu y syroopnan ta bon mezclá. Despues nan ta agrega su sahor y suco den forma di pocier certificá door di departamento experimental.

E mezclá aki yama un "hornada". Esaki ta worde saca for di den su wea y gesprei cu suco fini mescos cu un bon kokki ta spre korst di bolo cu suco pa evita pegamento — nan ta corte den pidanan bruto, y despues nan ta pone den un mashin di extrusion unda operacion na linea di produccion ta cuminsa.

Si bo kita tapadera di un tubo di pasta di diente y primiele, dos cos lo socede: 1) un cinta largo di pasta lo spruit afor y 2) bo ta mira un ehemplo di loke e palabra "extrusion" ta nifica. E cinta di pasta di diente ta worde sacá for di e tubo na mes manera cu Compania Fleeer ta saca nan "hornada" for di den e mashin bao alta presion.

E cintanan largo di bals yama "pencils" y ta worde pasá den mashin na un stacion di proceso. Cada stacion tin un mashin complicá cu ta hala e careda continuo di "pencils" aden y cu ta corta nan den pida cu e mashin mes ta lora y seya automaticamente.

E pidanan di Bubble Gum completá ta worde poni despues den cahanan compacto y e cahanan ta bai departamento di embareacion pa medio di linea di produccion.

Una vez nan yega na punto di asamblea nan ta worde inspectá y paketa den cahanan grandi y pa medio di truck nan ta worde bareá pa nan varios destinonan.
